

EXTOKE
— FEE FREE TRADING! —

ExToke Decentralized

Ethereum Token Exchange

White Paper

Summary

ExToke is a new fee free Decentralized Ethereum ERC20 Token Exchange with absolutely no fees for buyer or sellers.

ExToke has set out to solve all of the problems associated with modern day centralized cryptocurrency exchanges, while also improving on the decentralized exchange concept.

ExToke will strengthen the DEX industry by offering an instant, trustless, secure token exchange process via our XTO smart contract.

A Letter From The CEO

Hello all,

I want to extend my thanks for your interest in the ExToke ICO.

We thank our community in advance for helping support our vision and to help make sure that it becomes a reality.

You can expect great customer service and regular updates from our team every step of the way!

Yours Sincerely,

Ben Vieri

Ben Vieri
CEO of ExToke

Introduction

With the advance of cryptocurrencies and blockchain technology over the past few years, more and more people are switching from traditional fiat-based financial system towards blockchain and cryptocurrencies specifically.

Since the beginning of 2017, the crypto market cap has increased from \$7,000,000,000USD to \$11,000,000,000 USD by mid July 2017. This number is continuously rising!

Furthermore, cryptocurrency trading volume exceeded stock trading volume by the end of 2017.

In this booming industry the Erc-20 token has become the driving force. The Ethereum Token Trading scene has grown in leaps and bounds over the past 12 month, however existing cryptocurrency exchanges are not able to handle the trading demands, nor can they offer a safe and secure trading solution.

ExToke has been developed to fill the gap in the cryptocurrency trading industry and to eradicate fees from the equation to benefit both traders and developers.

The Problem

The problems facing centralized exchanges are, but not limited to:

- High Fees
- Security concerns (money held in admin accounts)
- Serious risk of falling victim to hackers

The problems facing the DEX industry are, but not limited to:

- High Fees
- Lack of customer support

High Trading Fees

The top 30 cryptocurrency exchanges, on average, charge 0.2% trading fees for both makers and takers, which impact traders' profit margins significantly. Some exchanges claim that they charge low trading fees, but these reduced rates often only apply once a trader's volume has reached a very high threshold.

Difficulties of Real-time Trading

Due to rate-limited trading APIs, non-real-time transaction confirmation, and delayed order book updates, traders are unable to trade in real-time.

Asset Security Issues

Cryptocurrency trading platforms hold a large amount of cryptocurrency deposits, making them unavoidably the target of hackers. On February 24th, 2014, Mt.Gox, a Bitcoin exchange, was breached and lost 650,000 Bitcoin, which is currently worth \$2,500,000,000USD; in August 2016, Bitfinex, one of the world's top 10 cryptocurrency exchange, was hacked and lost 120,000 Bitcoin, currently valued at more than \$480,000 USD.

It seems like every other week we here about another crypto exchange being hacked. If investors continue to be concerned about security issues, then the growth of the cryptocurrency trading market will be affected.

Our solution

ExToke aim to solve the existing problems of current cryptocurrency exchanges. ExToke features ZERO trading fees to maximize traders' profit and overall user experience.

ExToke has the ability to process orders in real time via our XTO Exchange Smart Contract, achieving the true "real-time" trading experience.

Decentralized exchanges are the safest way to trade. With DEX, you hold your funds. You OWN your funds. They do not sit in an admin account waiting to be removed by an off-shore hacker! Our DEX solution offers complete security via our XTO smart contract.

YOU own your funds and they remain safe and secure within your wallet.

Our XTO smart contract safely and instantly carries out trades with no fees. ExToke make no commission from your trades and your funds are never at any point sitting in a wallet that does not belong to you.

We also offer a dedicated 24/7 support team via email, social media and live chat via Telegram.

Why Decentralized?

Decentralized exchanges completely eliminate the need for a third party service to hold user funds in a centralized system. Trading occurs in a peer-to-peer fashion through automated processes, without trading fees.

More importantly, funds belong to the users themselves. In contrast to centralized exchanges (CEXs), where if a user deposits their funds, they are basically the exchange's funds.

Furthermore, since there aren't any centralized servers to hack, there are no server downtimes or fear of a large scale hack." Decentralized exchanges are essentially apparatus upon which people can exchange, whereas centralized exchanges follow a model similar to a bank, holding custody over funds with limited oversight and the constant threat of hacks.

DEX provides a safe, fast and secure solution to trading tokens.

The Opportunity

An opportunity exists for a safe and secure trustless DEX. With more incidents of Central Exchanges being hacked, traders are becoming more aware of the need for a decentralized, safer solution!

ExToke not only offers an instant, decentralized trading solution but also charges no fees and provides unrivalled customer support in the DEX industry, thus ensuring that ExToke stands out from the very small pack of decentralized exchanges.

Benefits To Traders

Fees

No fees mean that traders can trade any number of tokens without worrying about taking losses due to fees. This allows the opportunity to use multiple short term trading strategies without pesky fees getting in the way!

Support

ExToke offers 24/7 dedicated support to ensure that your trading experience is as smooth as possible!

Benefits To ICO Holders

Marketing

Every token launch will be announced through multiple social media channels and mobile notifications via the ExToke Mobile Trading App. All projects will be listed on our website and social media to ensure maximum audience exposure.

Fees

A great incentive for investors to trade your token on our exchange.

Support

24/7 dedicated support for developers to ensure that investors have unlimited and uninterrupted access to trading your token.

Short Term Plan

ExToke 2.0:

ExToke 2.0 is our easy to use ICO Platform. Users will be able to launch a Crowd Sale directly from our platform. Members can participate via our platform and the transition from ICO to exchange listing will be a seamless transition that benefits all concerned.

Mobile Trading App:

Friendly, Easy-to-Use Mobile Application

In September 2018 Extoke will be launching our user friendly mobile trading app on Android and IOS.

Long Term Plan

Further developments and expansion. ExToke aims to stay ahead of updating technology and offering secure and profitable trading solutions for our members.

ExToke 2.0 (ICO's on ExToke)

An overview:

In September 2018, ExToke will launch our ExToke 2.0 Platform. This platform will include but not limited to:

- New modern user interface
- Mobile Trading App
- Airdrop App for ExToke Traders
- Crowd Sales from within the ExToke Platform

ExToke will only allow high-quality, promising ICOs that have passed stringent due diligence, smart contract code review, and legal compliance review by ExTokes's dedicated ICO review team.

Also, ICO tokens on ExToke can be traded on the ExToke Exchange immediately after the ICO.

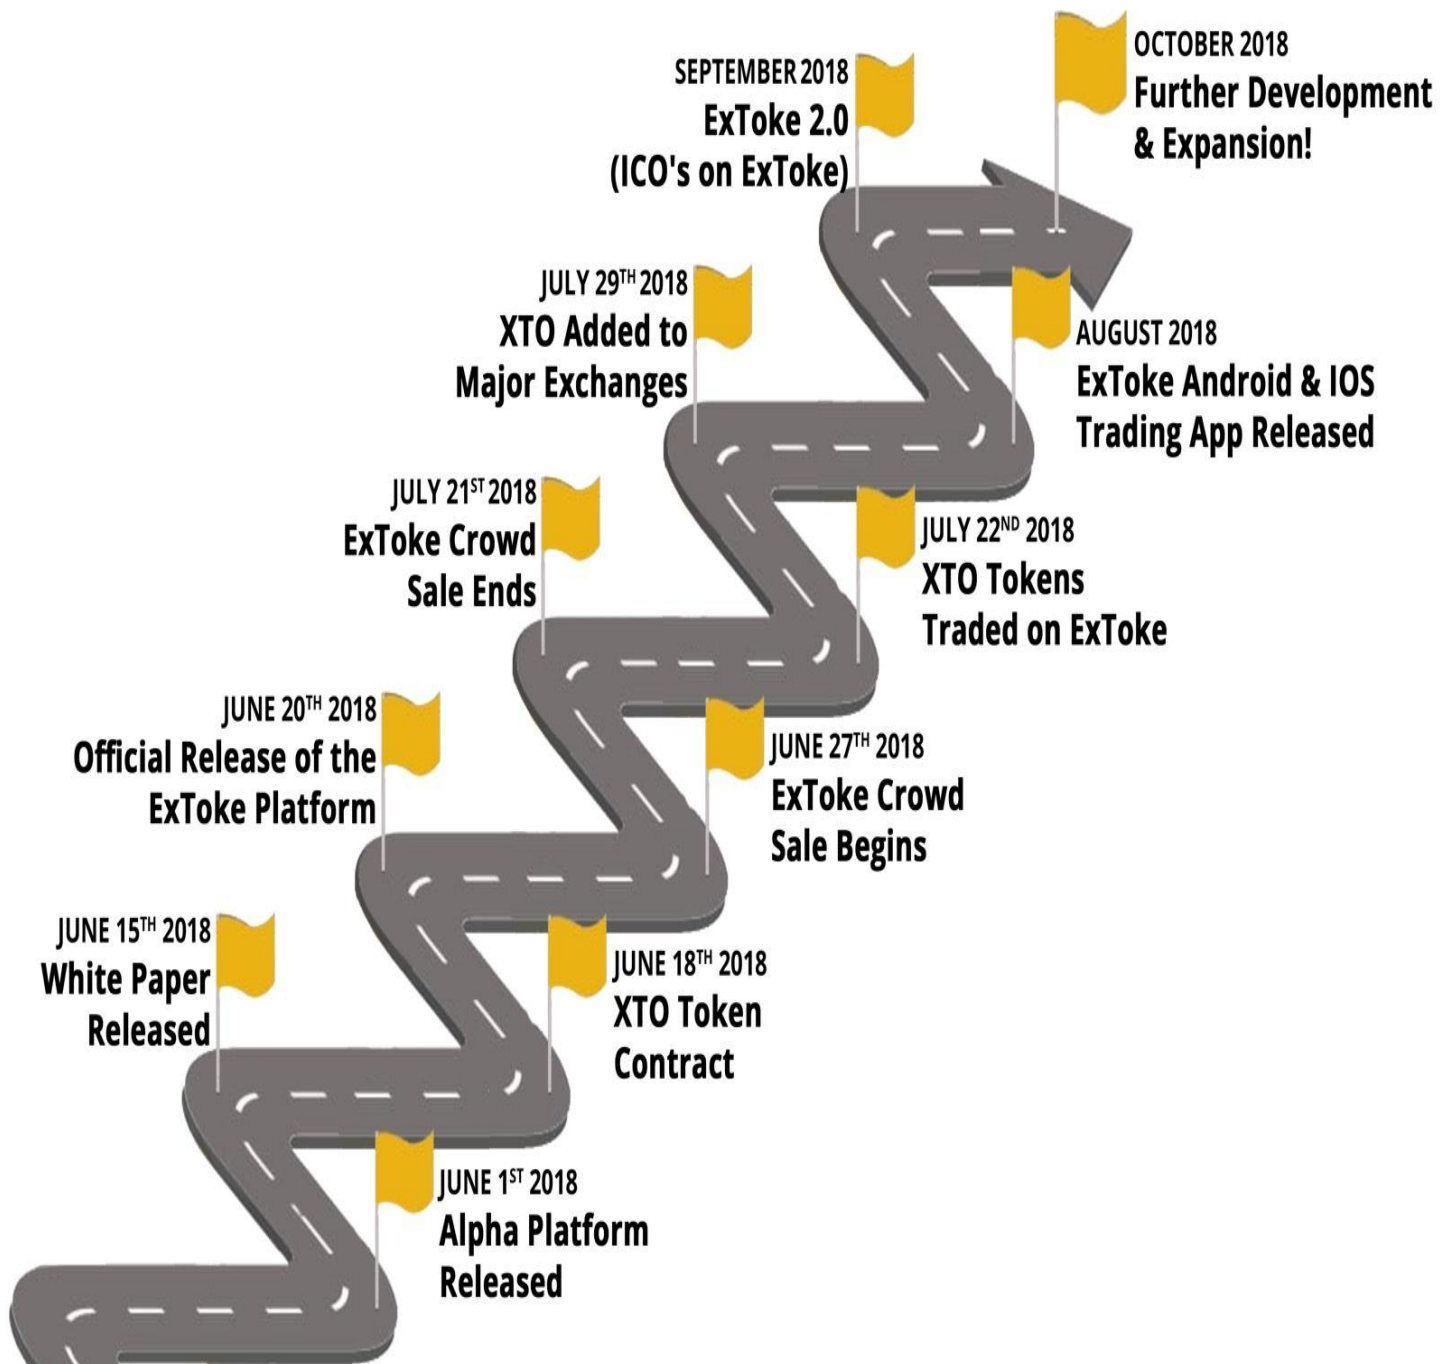

ICO Due Diligence

It is very difficult for ICO investors to tell if an ICO project is promising or not.

ExToke ICO Review Team makes a huge difference. The team will review ICO projects on different aspects, including project feasibility, idea novelty, financial justification, and legal compliance.

ExToke Road Map

XTO TOKEN FUNCTIONS & BENEFITS

Owning and holding XTO Tokens include many benefits which include but are not limited to:

Advertising:

Ads on ExToke are paid by XTO Tokens, however ads are free if you own XTO! Users receive 100 banners advertising credits for every 1XTO they hold.

ICO's on ExToke:

In September ExToke will run ICO's directly from our platform. Holders of XTO can run an ICO for free and you will also receive a 10% discount on participating on ICO's on the ExToke Platform!

A user who holds 1000+ XTO will be able to launch their own ICO directly on the XTO Platform and users who hold 100+ XTO will be eligible for 10% discount on any ICO launched on the XTO Platform.

Airdrops on ExToke:

Holding XTO in the ExToke exchange entitles you to the airdrops being launched within the XTO platform. This means free tokens for all holders of XTO holders!

<https://github.com/extoke>

What makes ExToke better than other decentralized exchanges?

Simply. We are free!!! We charge no fees, so the profits stay in your pocket. We also have a dedicated support team, which is absent in the decentralized exchange industry!

If ExToke charge no fees, how will the company remain sustainable?

To put it simply, we believe in ExToke and believe in the future of the company! Advertising revenues, investments and future expansion plans will ensure the sustainability and longevity of ExToke!

Conclusion

Blockchain technology and cryptocurrency payments are growing at an incredible rate, and we believe this will be the way we pay for goods and services in the future.

The need for users to hold and trade digital assets is growing by the day.

ExToke has been developed to allow users to safely, securely and instantly trade their digital assets in a trustless manner, so that ownership of their funds belongs to them ALWAYS!

ExToke also aim to offer our users a one-stop ICO solution and therefore provide new opportunities to investors and traders to participate in the cryptocurrency market.

Participate in our long-term growth and success story to exponentially change the world of crypto trading and crowdfunding. We look forward to welcoming you on board.
